Welcome to Ashwood Devons 2017

Our Third Sale

The 2016/2017 year has seen more successes for Ashwood in the show ring and in the paddock with some more great calves on the ground in spite of a long dry summer.

We continue to be delighted with the offspring of BON F11 (Bongalabi Bon Fantastic) who well and truly lives up to his name. He is a tremendously long and well muscled bull and reproduces those characteristics in his calves. Of the 13 bulls on offer at our sale this year 6 are from this "fantastic" sire.

ALL our bulls this year are super quiet. All are very good bulls, well balanced and well and truly ready for work. Their diets are supplemented with a small amount of grain through winter but essentially they are grass fed, paddock reared animals.

ASHWOOD KNOCKOUT, our back to back "Ekka" Grand Champion bull is also earning his keep with his first calves now making an entrance. We expect we will be proudly offering some of these at our 2019 sale.

ASHWOOD SNOWBELL 20 with two day old bull calf by
ASHWOOD KNOCKOUT

It is always difficult to choose females which you are prepared to part with, especially when they are all quality heifers produced with the sole purpose of enriching a herd and securing the future with good females. We are nevertheless offering three joined heifers which will add class genetics to any herd.

Once again we are proud to be offering excellent paddock reared bulls and females at our sale. We look forward to welcoming you to what we know will be a happy and informative day.

And please support the local and district businesses that have provided us with their support in the production of our cattle, and of this catalogue.

Malcolm & Jo

Happenings at Ashwood

This year's bulls ... an organised and quiet bunch

SOMETHING SPECIAL

In 2015, when Ashwood Cara 1 was crowned Grand Champion Female, then Supreme Devon Exhibit at the Sydney Royal, the judge commented that her calf at that time was as good as, if not better than her dam.

In 2017 that calf went on to prove him right when Ashwood Cara 10 took out Grand Champion Female at the Sydney Royal.

And to continue the proud tradition of the Cara line which has given us so much pleasure, and won many broad ribbons for us, our new Grand Champion has just added to the line by producing her second beautiful heifer calf (Ashwood Cara 13), sired by another Ashwood Grand Champion (Ashwood Knockout).

Followers of "Marmite", the calf with the nouse to keep his cool, will be pleased to know he continues to prosper.

Full of attitude, Marmite and his mum, are local heroes here at Ashwood. He has become a model to his young mates for his ability to find new ways to prosper and amuse!

Follow us on our website, Facebook and regular mailings.

If you would like to be on our mail list let us know your contact details.

BULL Veterinary and Health Information

During their life animals offered for sale have been subject to industry approved care and handling. This includes treatments for health and disease, regular livestock handling and proper feeding and watering. The outcomes are well-grown, fit and healthy cattle free of disease.

All sale bulls have been examined by veterinarians prior to sale. Each bull is subject to scrutiny for conformation, weight for age, mobility, and temperament. In particular each bull is examined for fertility and male function testing. Further information provided on sale day.

All bulls are offered for sale ready to perform as breeding males.

This is your guarantee and confirmation that bulls leaving this sale are fit for work.

A 'SILENT' Auction

The sale will be conducted as a "silent" or Helmsman type sale. Buyers register with their trading information and PIC on arrival.

A white board with reserve prices for each bull and female will be prominently displayed from 09:00. All bulls and females are on the market simultaneously. The **ACTIVE** part of the sale is between 11:30 and Midday during which time buyers approach the sale monitor to place a bid for their choices.

The sale progresses when buyers increase prices for the sale cattle. The monitor will show new bids on the sale board with buyers' numbers.

Buyers can bid on more than one bull or female at the same time.

Prices advance by a minimum bid of \$250 for bulls and \$100 for females.

From midday any further increase in bids must be made during a two minute period following any previous bids.

At the completion of the sale, invoices will be provided to all buyers for immediate settlement with Ashwood Devons. **GST will be added after the sale concludes.**

If buyers wish to use the service of an agent, the agent must be in the company of the buyer or make advance arrangements. A commission of 4% of the purchase price will be paid to such agents.

Further information about the conduct of the sale will be provided on Sale Day.

Directions to Ashwood Selling Centre

Travellers from the North (Taree) on A1:

Take the first exit to Bulahdelah, take 2nd exit into Lee Street and then turn right at roundabout into Markwell Road

Travellers from the South (Raymond Terrace) on A1:

Take the first exit to Bulahdelah, turn left into the main street of Bulahdelah. Head north on the main street which becomes Markwell Road.

Travellers from Gloucester:

Travel towards Waukivory; continue through Markwell on Markwell Road.

The property is on a crest on the East side of Markwell Road. Signs will mark the entrance on Sale Day.

**Complimentary tea and coffee from
09:00 and BBQ lunch after the Sale.**

Keynote speaker

Damon HOLMES

Operations Manager, National Livestock Reporting Service, MLA

Low female cattle slaughter and high carcase weights have set the scene for 2017, with these two components filtering through to influence the 2017 April Cattle Industry Projections Update.

While the January estimate of 7.1 million head cattle slaughter remains, much heavier carcasses will go a long way to alleviating the constrained supply pressure, with the result being only a slight (1%) year-on-year decline in beef and veal production.

"I grew up in Theodore (Pop 500 people) in central Qld on a 13,000 acre family-run cattle property of about 2,500 head.

For 25 years, we have operated a 500 head registered feedlot selling directly to Woolworths.

Before starting as a cattle market analyst at Meat & Livestock Australia, I completed a Bachelor of Economics at the Queensland University of Technology.

For the past 3 years I have been the Operations Manager of the National Livestock Reporting Service. The NLRs has 28 staff filing regular reports from sales across Australia."

CAN MINERALS MAKE A DIFFERENCE? YES; AND SO CAN YOU.

As you and I age, we need more specialised nutrition. Fish oil for joints, vitamin D, calcium and magnesium for bones; vitamin B for energy and vitamin E and selenium for healthy tissue. There is lots of research to support this. High performance humans need extra attention too; pregnant ladies, growing adolescents and elite athletes. The same is true for our sheep and cattle.

Grazing animals with a good mineral mix in their diet perform better. They have stronger immune systems, transport easier are less prone to the effects of stress. There is also loads of research to support this.

Mineral supplementation is not a difficult nor expensive job. Keeping a supplement, like Anipro Liquid Supplement, in the paddock all year round. Stock will take a little every day. You will be surprised at the results on green grass, and you will be happy with the way they hang-on in the dry. Try it – I dare you. And while you're at it – do the same for yourself. Your livestock rely on you.
